

# Covenant Sets New Record, Again, Crosses 900 Publications for the Year 2018!

---

*As at Sunday 9th December 2018, Covenant has crossed 900 publications for the year by having 907 publications indexed in the Scopus database. This is 52.18% above the publication figure for the entire year in 2017, which stands at 596.*

The result further shows that the 907 publications already attained in 2018 represent 28.85% of the total publications of the University since inception. The speed that God has granted Covenant is such that 77.89% of the total publication figure of the University since inception was generated between 2016 and 2018, with seven papers already listed for 2019.

Covenant's drive for quality research has been severally recognized by international ranking agencies in many research areas in Nigeria and beyond. Examples are seen in the recently released Times Higher Education (THE) World University Rankings (WUR) 2019, as well as the THE's Subject Rankings, where Covenant has emerged as the only Nigerian varsity ranked.
